

Aluminium Bronze

Aluminium Bronze is characterised by its excellent resistance to corrosion in sea water

Aluminium Bronze bar stockholders and suppliers, delivering throughout the UK. West Yorkshire Steel are suppliers of a range of sizes and grades in aluminium bronze round bar. Specifications are available conforming to British, ASTM, UNS and European standards.

Commonly stocked in grade CA104 with other standards also available. Aluminium Bronze is characterised by its excellent resistance to corrosion in sea water and its high tensile strength which is typically in excess of 650N/mm². Aluminium bronzes are often used in applications where their resistance to corrosion makes them preferable to other engineering metals. It also offers good resistance to abrasion.

We welcome export enquiries for aluminium bronze. Contact our sales office and consult our [shipping policy](#) for further details.
