

Plasma Cut Stainless

Plasma cut stainless steel profiles suppliers, delivering to the whole of the UK. West Yorkshire Steel are suppliers of plasma cut stainless steel plates, produced to close tolerances. Plasma cut to a high degree of accuracy the stainless steel profiles require minimum final machining. Plasma cutting stainless steel plate provides a good quality cut with minimal effects on the properties of the stainless, with no detriment to the corrosion resistance. With plasma cutting there is minimal heat input, minimum distortion and with a clean edge a minimum requirement for deburring the cut stainless plate. Plasma cut blanks are supplied in austenitic grades (300 series) of stainless steel.
