

Aluminium

Aluminium grades can offer reasonable strength with good mechanical properties

Aluminium bar and plate stockholders and suppliers, delivering throughout the UK. West Yorkshire Steel are suppliers of a range sizes and grades in aluminium. Bar, plate, sheet and flat section is available cut to your requirements. Engineering aluminium grades can offer reasonable strength with good mechanical properties. Other characteristics are corrosion resistance, machineability and weldability. Common grades supplied include 6082, 5083, 7075 and 2014.

Aluminium tooling plate is also available. As a cast tooling plate it is ideally suited for applications such as fixtures, bedplates and other tool related components.

We welcome export enquiries for aluminium bar and plate. Contact our sales office and consult our [shipping policy](#) for details.
