

Bandsaw Cutting

Bandsaw cut pieces, suppliers to the whole of the UK. Our modern bandsaws offer cold sawn cut pieces in a comprehensive range of tool steel, stainless steel, carbon and alloy steel grades. Rectangular cut block and plate can be cold sawn to achieve a size close to your finished dimensions. Round bar can be cold sawn up to 1000mm in diameter. Steel blanks can be bandsaw cut as 'one offs' or multiple pieces can be supplied using our fully automated bandsaw cutting facilities.

We welcome export enquiries for bandsaw cut pieces. Please contact our sales office and consult our [shipping policy](#) for further details.

Details of your enquiry

When enquiring on bandsaw cut pieces please ensure you provide the following information to our sales team:-

- Size & quantity - details of the shape, size, length and quantity.
 - Steel specification - full details of the steel grade.
-

Steel specifications

West Yorkshire Steel are stockholders and suppliers of a large range of steel grades and specifications. Our sales team will provide a friendly and reliable service combined with a wealth of experience and knowledge. Use the search box at the top of this page to help you find your required grade. If not shown on our website then please contact our sales team who can search our comprehensive database to see if any equivalent grades are available.

Certification

Bandsaw cut steel pieces are available with a BS EN 10204 3.1 mill certificate, a cast and analysis certificate or certificate of conformity. Please request what (if any) certification requirements are needed when placing any orders.

Quality Assured Supply

All cold sawn pieces are supplied in accordance with our ISO 9001:2015 registration.
