

## Austenitic Stainless Steel

Austenitic stainless steels are non-magnetic and cannot be hardened by heat treatment

---

**Austenitic stainless steel stockholders and suppliers, delivering to the whole of the UK.** West Yorkshire Steel are suppliers of austenitic stainless steel round bar, flat bar and plate (plasma cut). Austenitic stainless steel specifications are supplied in a large range conforming to British, European, American and International standards. West Yorkshire Steel also supply high alloyed austenitic grades such as [S31254](#) and [904L](#). With the average chromium content of 18% and nickel content of 8% austenitic stainless steels are sometimes referred to as 18/8 (although the actual chromium and nickel content can vary widely from these figures). Austenitic stainless steels are non-magnetic and cannot be hardened by heat treatment, though they can strain harden rapidly when cold worked.

We welcome export enquiries for stainless steel. Contact our sales office and consult our [shipping policy](#) for further details.
