

BS1452 Grade 260 Cast Iron

Available in flats and rounds.

BS1452 Grade 260 Cast Iron suppliers, delivering to the whole of the UK.

Cast iron bar BS1452 Grade 260 is continuous cast and supplied in rounds and flats. With its fine grain structure BS1452 Grade 260 can be machined to achieve a good polished surface finish and is suitable for copper or chromium plating. As a continuous cast iron bar grade BS1452 Grade 260 has a fine grain structure, combined with the fine graphite flake size and dense homogeneous structure.

- Diameter
- Flat

Typical Analysis

Carbon	2.90-3.65%	Silicon	1.80-2.90%
Manganese	0.40-0.70%	Sulphur	0.10% max
Phosphorous	0.30% max	Iron	balance

Typical Properties

**Typical Tensile
(subject to section)**
N/mm²
165-205

**Typical Hardness
(subject to section)**
HB
160-255

Mechanical properties shown are typical and may vary subject to the size and section of this cast iron grade.

Certification

Cast Iron Grade BS1452 260 is available with a certificate of conformity, please request when placing any orders.

Quality Assured Supply

BS1452 Grade 260 cast iron is supplied in accordance with our ISO 9001:2015 registration.
